

American Fabric Filter Co.

Your ultimate source for dust bags, screens and rubber products!

Vinyl Catch Cloths

Make Cleanup a Breeze!

American Fabric Filter manufactures custom vinyl catch cloths for installation under conveyors, providing a cleaner environment by keeping errant product from being transferred throughout your plant and saving time during cleanup as all of the spillage is contained in one area. Catch cloths are especially popular in the food processing industries to prevent product from dropping onto other lines or to the floor, but can be used underneath any conveyor where falling material can be a nuisance.

Catch cloths also give a favorable impression during AIB inspections or when customers tour your facility. Call AFF for all of your catch cloth needs including installation, measuring, and replacement. We can produce catch cloths for any width conveyor and are experts at 45° and 90° bends as well as custom chutes and funnels. We also stock S hooks for easy installation.

Catch Cloth Services

American Fabric Filter also provides catch cloth installation service. We will visit your site to measure for cloths, quote, and install! We will work around your schedule to install during downtime while maintaining a sanitary environment and have proven methods that offer great fit. We can also arrange to come in and train your employees how to efficiently install cloths on your entire system.

Call, fax or e-mail us for a no-obligation evaluation of your equipment's performance and a free quote.
