

American Fabric Filter Co.

Your ultimate source for dust bags, screens and rubber products!

Standard & Special-Order Fabrics

"FABRIC" Is Our Middle Name

AMERICAN FABRIC FILTER's technical sales staff gets to choose from dozens of fabrics when they're designing your filters, connectors or other custom products. First, we will talk to you about your requirements. Next, we will make suggestions for materials and designs. Finally, with your input and approval, we will custom manufacture the products quickly and cost-effectively.

In addition to common woven and non-woven textiles, we stock vinyl / rubber-coated fabrics, synthetic / stainless steel screening and a range of snap bands, webbing and hardware. We also work with an extensive range of special order fabrics for applications needing high temperature, chemical resistance, extra strength or air permeability. Many unique fabrics are, or can be treated to shed sticky dust, bleed static electricity or resist burning.

To determine exactly how much fabric you need to attain your desired level of filtration, use our handy air flow to cloth calculator. Remember that your manufacturer's recommended bag size is most likely smaller than necessary to achieve proper filtration.

Call, fax or e-mail us for a no-obligation evaluation of your equipment's performance and a free quote.
