

American Fabric Filter Co.

Your ultimate source for dust bags, screens and rubber products!

Custom Fabric Filter Bags & Sleeves

Woodworking

Woodworkers require a highly effective dust management system. You hope your dust collector provides maximum vacuum to gather up everything from large chips to fine sanding dust, with maximum filtration to return clean air back to the environment.

While all dust collectors do something, many do neither of the above very well.

AMERICAN FABRIC FILTER CO. has spent nearly 20 years designing and fabricating optimized custom dust bags and sleeves to go on collectors ranging from 1/3 HP drum top hobbyist units to 100+ HP factory bag house systems. We talk to every customer to determine what equipment, plenums, etc. they have, how it fits in their workspace and their specific filtration needs. We make recommendations -- and mutually determine what to make.

A small collector's performance can improve dramatically with increased filter area. Hobbyists may only require a slightly larger, light duty filter. Commercial shops need larger filters with thicker fabrics. Optionally, we make these with hanging loops, inlets for any size, shape or location, skirts, belt loops and many more add-ins. Sometimes we need to add extra "sister" bags to get the proper airflow without back pressure.

Baghouse systems benefit from replacement dust bags or sleeves made with new fabrics engineered to pass more air while blocking fine dust

Call, fax or e-mail us for a no-obligation evaluation of your equipment's performance and a free quote.
